ABSTRACT

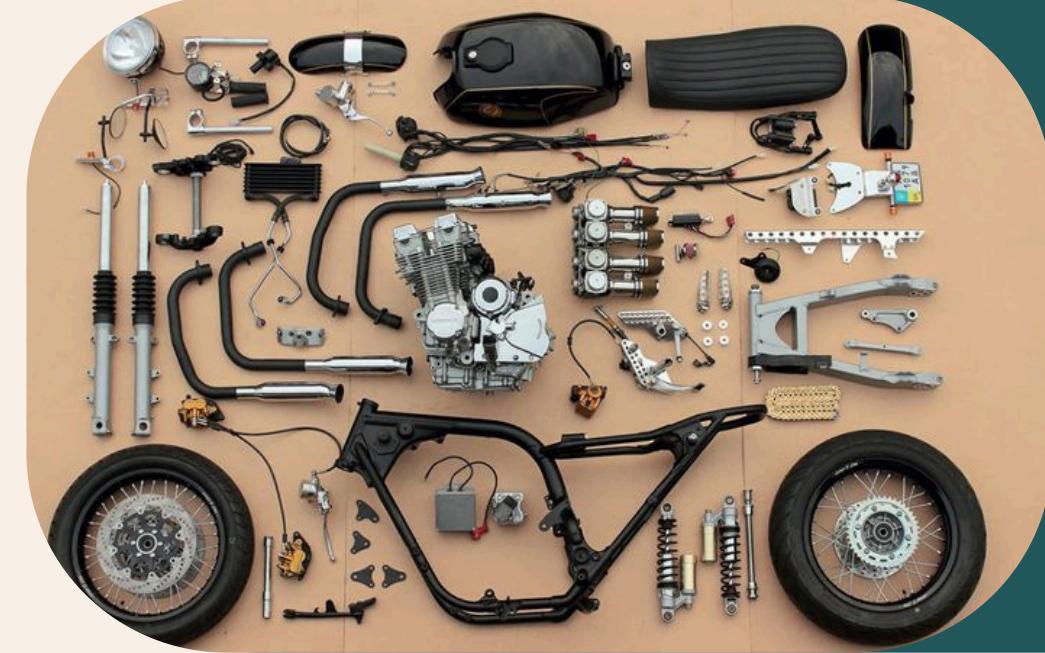

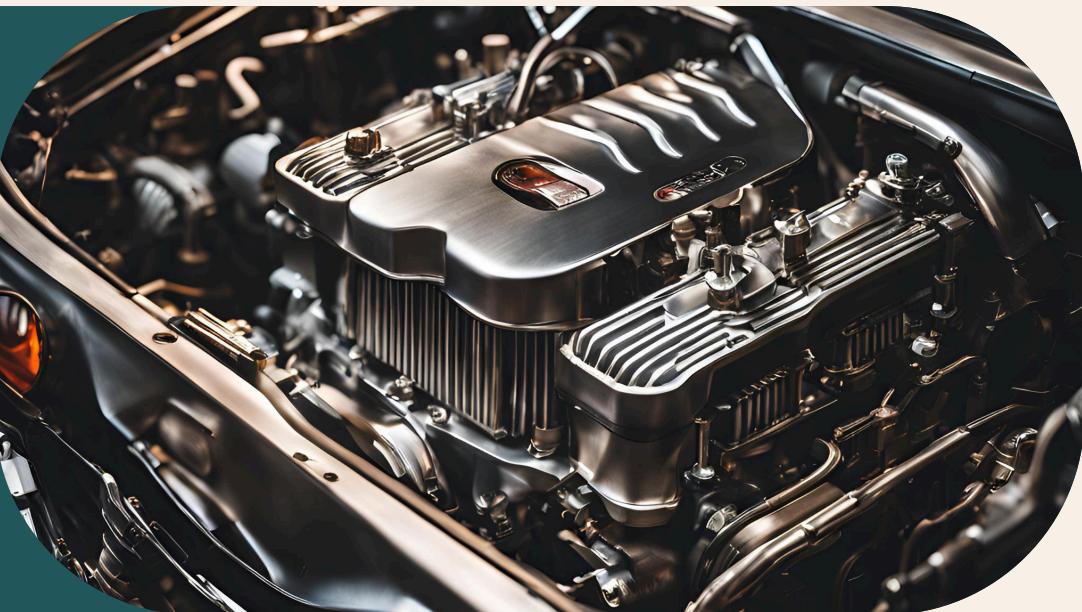

"Animated Solutions Transform Vehicle Repairs"

Our innovative automobile application simplifies vehicle issues like engine problems, tire malfunctions, and dashboard warnings through concise, animated, step-by-step solutions, making troubleshooting effortless for all users.

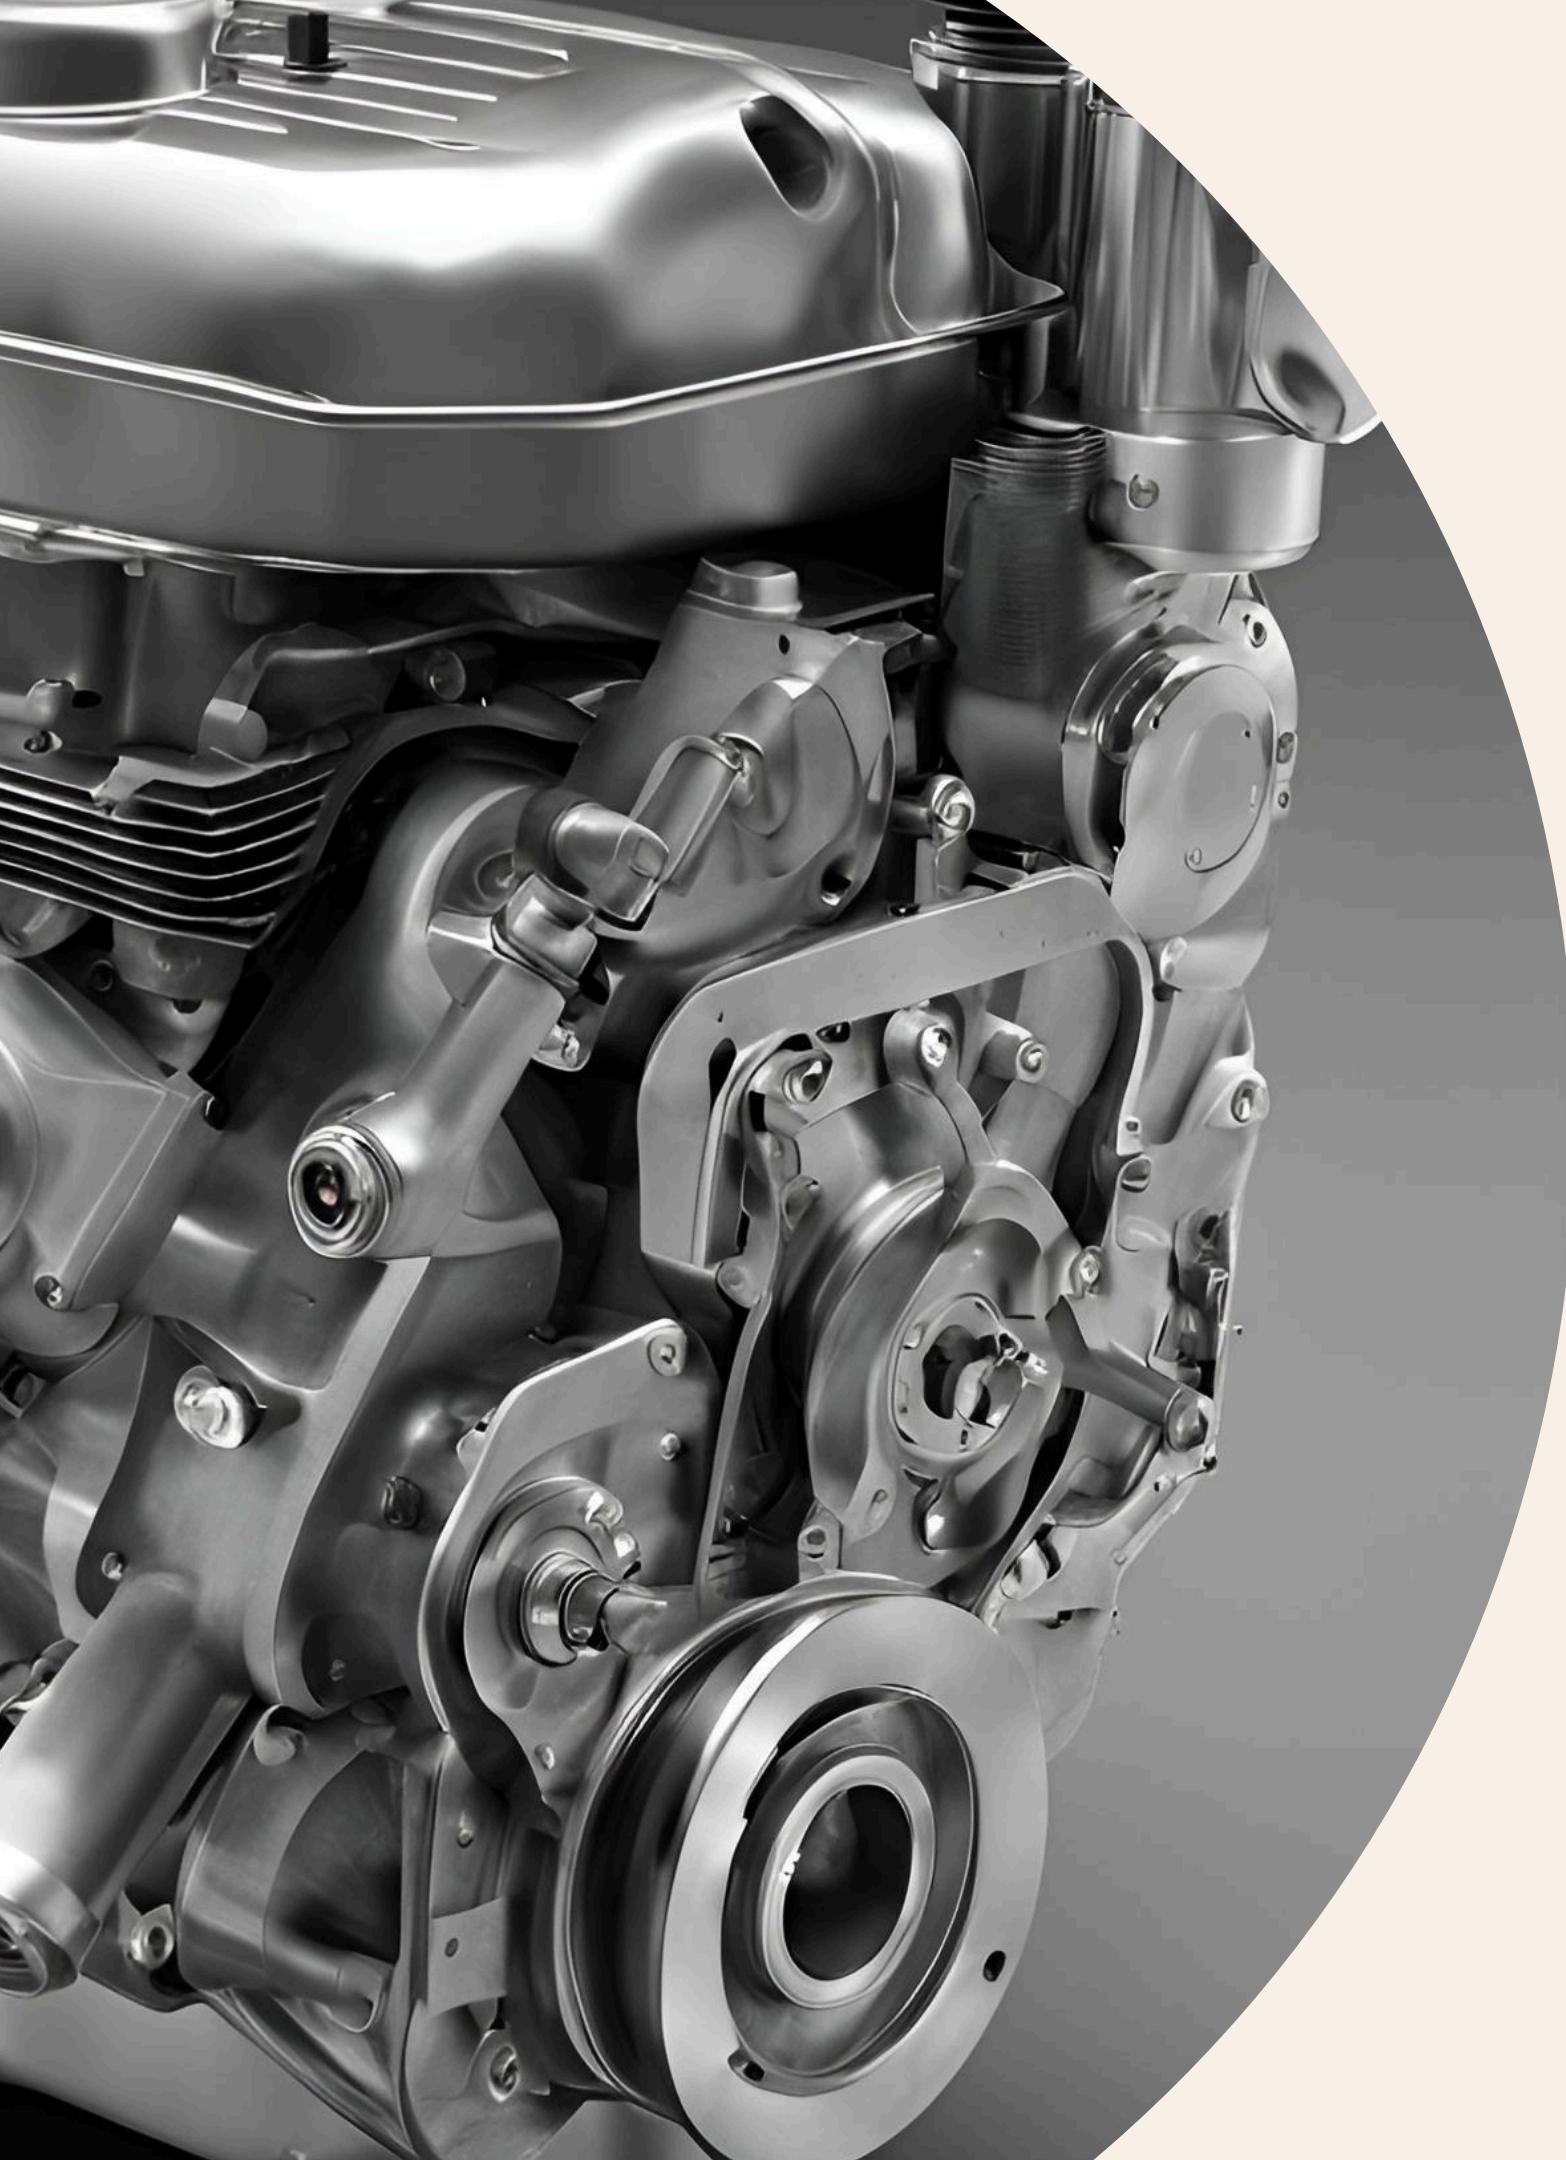

INTRODUCTION

- Vehicles are crucial, but problems like engine failures, flat tires, and warning lights often frustrate drivers.
- Traditional troubleshooting, like manuals or mechanic visits, is time-consuming and hard to follow.

- The app uses visuals and simple guidance to help users diagnose, fix, and maintain their vehicles confidently.
- Our app offers animated, step-by-step solutions for common vehicle problems.

OBJECTIVE

- Simplify Vehicle Troubleshooting
- Consistent Improvement
- Foster Community Interaction
- Reduce Dependence on Mechanics
- Promote Self-Sufficiency in Repairs

LITERATURE SURVEY

Car Mechanic Simulator (2015):

Consist Game-based, which may not directly solve real-world problems.

RepairPal (2007):

Lack of animated or interactive content. A website and mobile app offering a platform for car repair advice, estimates, and troubleshooting

AutoMD (2007):

No animated or visual content . Limited interactive animation for problem-solving.

MechanicBase (2018):

Limited animation for step-by-step processes.

PROPOSED METHODOLOGY

Animated Solutions for Common Vehicle Problems:

The app provides simple, animated step-by-step guides for common car issues, like tire changes and dashboard warnings, making it easy for users with minimal technical knowledge to resolve problems.

Interactive Community Platform

The app provides simple, animated step-by-step guides for common car issues, like tire changes and dashboard warnings, making it easy for users with minimal technical knowledge to resolve problems.

Interactive Community Platform:

The app provides simple, animated step-by-step guides for common car issues, like tire changes and dashboard warnings, making it easy for users with minimal technical knowledge to resolve problems.

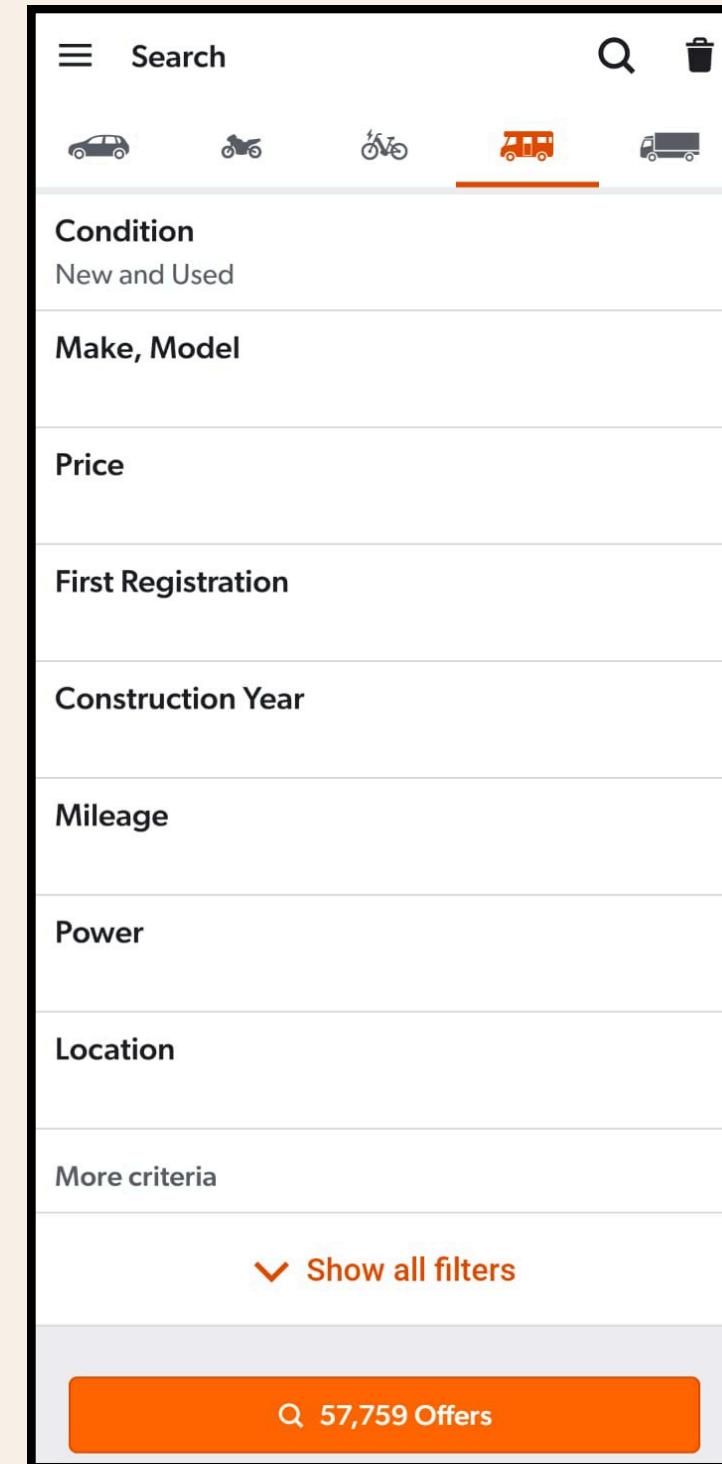

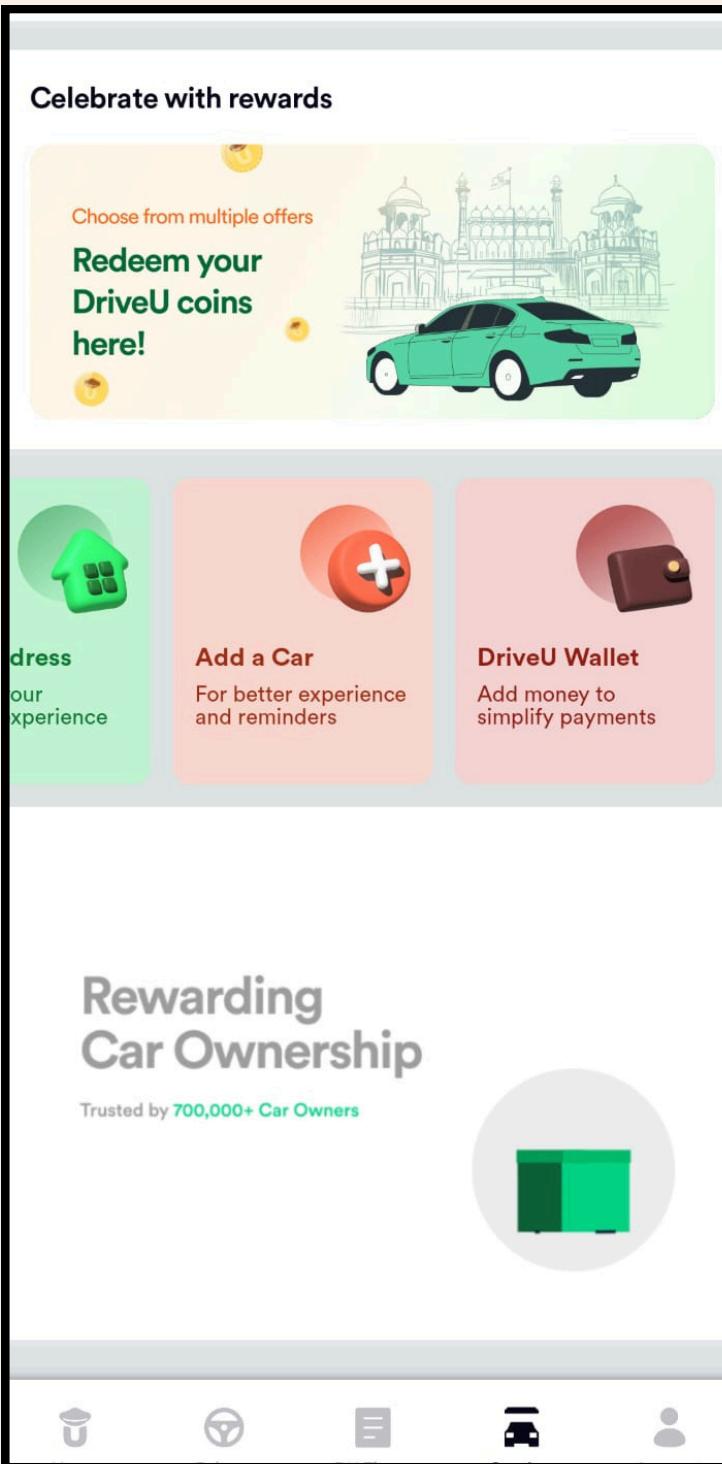

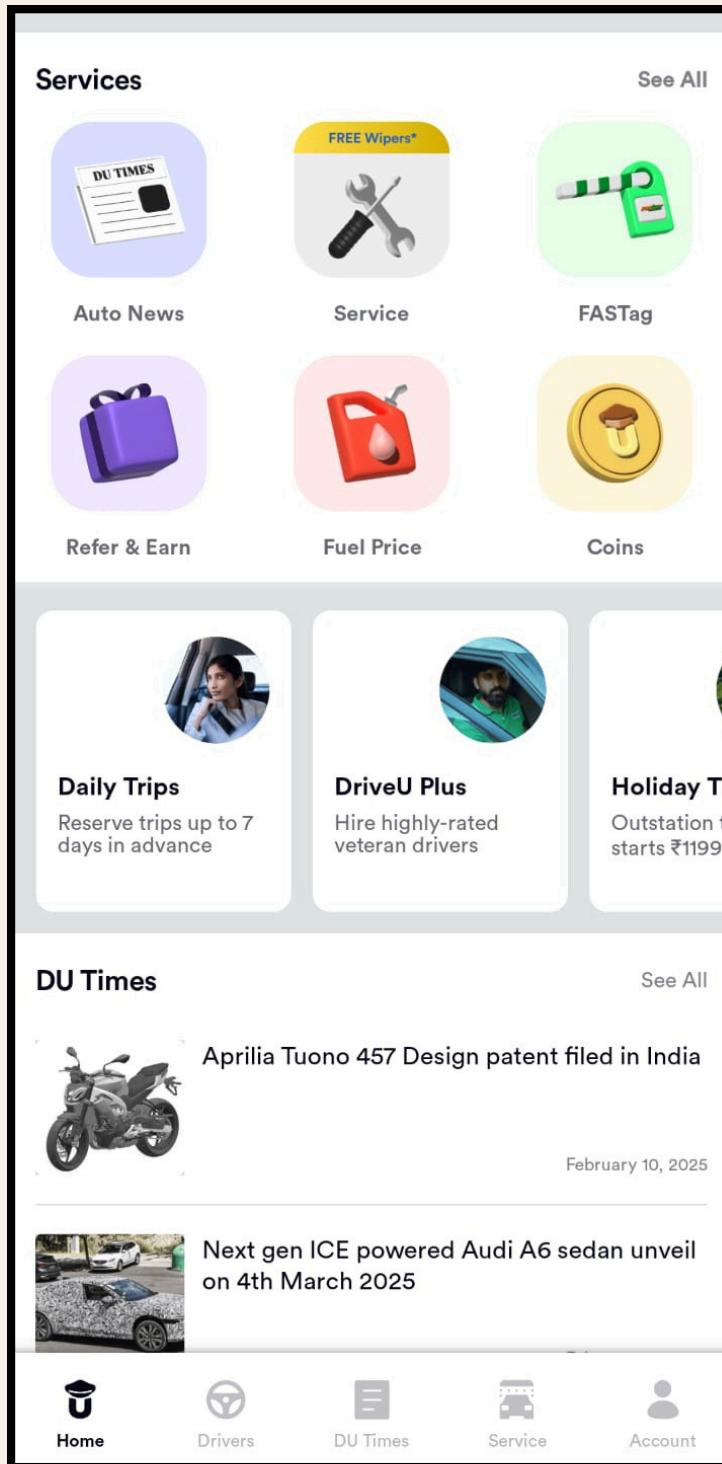

Voting System for Content Prioritization:

The voting system lets users prioritize problems for future animations, ensuring content development aligns with their most pressing needs.

Human-to-Human Problem Solving:

The app fosters peer-to-peer interaction, allowing users to share real-world solutions and insights, offering practical strategies beyond traditional manuals.

"Why is my car's air conditioning blowing hot air?" #query
I recently noticed that when I turn on the A/C, it's only blowing hot air instead of the cool air I'm used to. I've checked the thermostat and it seems fine. Is it something simple like a refrigerant issue or a bigger problem?

Why is my car making a weird noise when I turn the steering wheel?
Every time I turn the steering wheel, I hear a squeaking or grinding noise. It's not constant, but it's noticeable. Could this be a sign that my power steering fluid is low or something more serious?

"How do I know if my car's battery is dead or just needs a jump start?"
I tried to start my car this morning, and it wouldn't start. The lights are dim, and the engine just clicks. How can I tell if it's the battery, or if I need to check something else before jumping it?
